| <input type="checkbox"/> Library | <input type="checkbox"/> Archives – Binders, Manuals, etc | |

Special notes:

Measuring Instructions

- All measurements are to be accurate to 1/8 of an inch
- On the wall, measure corner to corner at 3 elevations (knee, chest, head top). Repeat 16 inches out from the wall (6 measurements total). Record the smallest dimension on your diagram.
- Also note on your drawing:
 - Ceiling height
 - Door size and swing, if applicable
 - Return size; if you have a bi- fold door installed adjacent to a return (usually on a reach in closet), fully open the doors and measure the return including the folded up door
 - Ceiling hatch or access panel locations

THANKS FOR CHOOSING FORT MCMURRAY CUSTOM CLOSETS!
